EDUCATION

Indian School of Business Post Graduate Programme, Majors - IT Management & Entrepreneurship	April 2025 – April 2026 Hyderabad, Telangana
Manipal Institute of Technology B.Tech – Information Technology (Minors in Big Data)	August 2018 – July 2022 Manipal, Karnataka

WORK EXPERIENCE

Amazon India | Senior Software Engineer (Contracted via Quadrant Resources) May '23 – March '25

Key Responsibility: Orchestrate **Robotic Process Automation initiatives** for routine tasks to increase employee bandwidth for **12 client teams**
Key Achievement: Selected as the **Youngest Tech Lead** leading a **4-person team**; delivered 7 automations within 1 quarter for APAC Retail Product Management

- **AutoDev** – Launched a **low-code visual product** to enable non-technical users to **autonomously build automations** via flowchart model
 - Conducted market research & analysed **2 competitors** to conceptualize the product, defined the user journey & MVP feature requirements
 - Developed monthly roadmaps to build & launch MVP in 3 months; led to **8% revenue growth for team & 15% additional client savings**
 - Strategized **marketing plan** via internal demos and white papers to increase awareness; **adopted by 6 new orgs (100+ users)** in 2 months
 - Enhanced 8 features after **A/B testing** and **usability testing** with 50+ users, **halving automation development time** (4 wks vs 2 wks)
 - Incorporated **feedback** after user interviews to **capture product ideas** and **prioritize enhancements** by frequency and business impact
- Identified **new hires' pain points** while onboarding; resolved by **automating** necessary installations dropping **setup time by 93%** (1d vs 45m)

Product Development

- Led the migration from **monolithic to microservices architecture** of an internal product in 2 months **cutting release failures by 40%**
 - Designed architecture diagram and planned a 2-month roadmap ensuring a balance between engineering effort and business continuity
- Developed **7 automations** for **EU Procurement**, optimizing for data accuracy and operational reliability, saving **15K annual hours** (~ \$2M)
- Shipped **10 automations** for **APAC Retail**, streamlining reporting & communication with vendors to **save 20K hours & \$500K annually**
- Developed **internal SDK with 700 capabilities** to drive scalability & long-term reliability of automations **reducing 70% engineering effort**
- Implemented **drag-and-drop feature & UI-to-JSON conversion layer** for AutoDev increasing **Customer Effort Score** from 4/10 to 7/10

Stakeholder Management

- Devised a **4-week pilot program** to partner with prospective clients for Proof-of-Value automations **converting two \$50K annual contracts**
- **Chartered the automation roadmap** for 4 client teams balancing business requirements with impact-effort trade-offs **achieving 84% NPS**

Microsoft India IDC | Software Engineer July '22 – March '23

Key Responsibility: Spearheaded **automations and quality programs** for the CRM team in **Microsoft Dynamics 365** as a Backend Developer
Key Projects

- Identified deprovisioning inefficiency via **RCA of 300+ tickets**; automated global cleanup across US-West-2 orgs; **reduced \$50K/month COGS**
- **Decreased ticket volume by 7%** by embedding edge-case validations and driving E2E testing in collaboration with cross-functional team
- Elevated post-release quality in **Cosmos-to-SQL migration**, by leveraging Unit and Functional Test framework, **lowering bugs by 24%**

PRODUCT PORTFOLIO

Auctions Portal & Scorecard Portal – ISB Super League [[Auction Portal Link](#)] [[YouTube Link](#)] [[Scorecard Portal Link](#)]

- Built an E2E auctions and scorecard portal defining use cases for both admin and spectator side ensuring seamlessness for all views for ISL
- Auctions Portal had a **1.1K unique visitors** on the day of auctions and scorecard portal had **9.6K unique visitors with 46.1K page views**

Campus Eats – Digitizing Food Ordering Experience at Cafeterias [[Product Link](#)]

- Defined features for **browsing, ordering and collection** after conducting primary interviews for easier food ordering in Campus Cafeterias
- Built user journey using Lovable and tracked DAU, number of orders placed daily and **GMV as north-star metric** for product growth

AI Negotiator – AI Copilot for Complex Contract Negotiations [[Product Link](#)]

- Designed an **E2E negotiation workspace** with clause-level explanations, suggested counters & scenario simulator to quantify risk & impact
- Built a structured **Negotiation Memory** that captures decisions and rationale so similar clauses in future deals can reuse prior context

ACHIEVEMENTS & CO-CURRICULARS

- **First Runners Up (2/50) – Product Case Competition**, Ideated Big Basket Now's tiered loyalty program projecting **15% boost in retention**
 - Designed **integrated voice-to-order** and **personalized order reminder** projecting 9% growth in Monthly Order Volume; built UI on Figma
- **Winner, Manipal Hackathon 2019** – Built an AI meeting assistant to improve meeting efficiency by reducing digression & resolving disagreement
- **Live Project** - Developing GTM strategy to position **Catholic Health Association (CHAI)** as corporate CSR partner for **top 30** healthcare funders

POSITIONS OF RESPONSIBILITY

- **Vertical Lead, Tech, ISB Super League** – Built an auction and a scorecard portal for ISB's annual sports fest (ISL) with **800+ participants**
- **Vice President, The Photography Club** (2020-21) - Led 200+ members, hosted 3 competitions (1K participants), **boosted SM reach by 40%**
